Increasing COVID cases have created panic amongst the people of Chefland, so the government is starting to push for production of a vaccine. It has to report to the media about the exact date when vaccines will be available.

There are two companies which are producing vaccines for COVID. Company A starts producing vaccines on day D_1 and it can produce V_1 vaccines per day. Company B starts producing vaccines on day D_2 and it can produce V_2 vaccines per day. Currently, we are on day 1.

We need a total of P vaccines. How many days are required to produce enough vaccines? Formally, find the smallest integer d such that we have enough vaccines at the end of the day d .

Input

- The first and only line of the input contains five space-separated integers D_1 , V_1 , D_2 , V_2 and P .

Output

Print a single line containing one integer — the smallest required number of days.

Constraints

- $1 \leq D_1, V_1, D_2, V_2 \leq 100$
- $1 \leq P \leq 1,000$

Subtasks

Subtask #1 (30 points): $D_1 = D_2$

Subtask #2 (70 points): original constraints

Example Input 1

1 2 1 3 14

Example Output 1

3

Explanation

Since $D_1 = D_2 = 1$, we can produce $V_1 + V_2 = 5$ vaccines per day. In 3 days, we produce 15 vaccines, which satisfies our requirement of 14 vaccines.

Example Input 2

5 4 2 10 100

Example Output 2

9

Explanation

There are 0 vaccines produced on the first day, 10 vaccines produced on each of days 2, 3 and 4, and 14 vaccines produced on the fifth and each subsequent day. In 9 days, it makes a total of $0 + 10 \cdot 3 + 14 \cdot 5 = 100$ vaccines.

CodeChef - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of **algorithms**, **computer programming**, and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and two smaller programming challenges at the middle and end of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

Practice Section - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in the language of your choice. Our **programming contest** judge accepts solutions in over 55+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

Compete - Monthly Programming Contests, Cook-off and Lunchtime

Here is where you can show off your **computer programming skills**. Take part in our 10 days long monthly coding contest and the shorter format Cook-off and Lunchtime **coding contests**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
